TROPICAL CYCLONE ADVISORY NR. 5
Tropical Storm HAGUPIT
Issued at 11:00 PM, 08 May 2026
Valid for broadcast until the next advisory at 11:00 AM tomorrow.

GENERAL OUTLOOK FOR THE FORECAST PERIOD

- HAGUPIT is forecast to move west northwestward during the majority of the forecast period and will remain over the Philippine Sea, far from land. It will enter the Philippine Area of Responsibility (PAR) tomorrow (09 May) afternoon or evening however, an earlier PAR entry is not ruled out. Once HAGUPIT enters the PAR, it **will be given the local name CALOY**.
- In the next 12 hours, HAGUPIT may maintain its strength or briefly reach severe tropical storm category. However, it may begin weakening starting tomorrow (09 May) due to unfavorable environment. HAGUPIT will be downgraded into a tropical depression on Monday (11 May) and become a low-pressure area on Wednesday (13 May).
- HAGUPIT is less likely to directly affect the weather and sea conditions in the next 3 days.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to continue monitoring for updates related to this tropical cyclone.

Unless there is an intermediate issuance, the next tropical cyclone advisory will be issued at 11:00 AM tomorrow.
